IMAGINE you can...

✦ Make a difference in the world.
✦ Address complex questions.
✦ Develop innovative solutions to solve some of the world’s critical challenges.
✦ Find your future in the College of ACES!

CONCENTRATIONS

AGRICULTURAL SCIENCE EDUCATION
Prepare to teach agricultural science, agribusiness, agricultural mechanics, and horticulture in high schools or to hold other positions requiring expertise in formal and non-formal education. Agricultural science educators teach in the public schools, do Extension work and other training and program development, and hold other education-related positions in agricultural and environmental agencies and businesses.

AGRICULTURAL LEADERSHIP EDUCATION
Prepare for positions of leadership in agricultural arenas by creating training and educational programming, making presentations, developing interpersonal communication skills, and practicing leadership development and training methods. Graduates from this concentration pursue successful careers as agricultural leadership and business trainers, agricultural sales and marketing representatives, Extension educators, agricultural youth educators, Farm Bureau managers, agricultural literacy coordinators, public relations professionals, and more.

“I enjoy learning about the many different aspects of teaching. The classes are fun and diverse. The variety keeps things interesting.”

~Bryanne Kalous
Agricultural Leadership and Science Education

futurestudents.aces.illinois.edu
The Agricultural Leadership and Science Education major blends theory with hands-on experience and real-world practice to prepare students to teach and create change.

Most graduates of the agricultural science education concentration start their careers as teachers in Illinois high schools.

Many students in the agricultural leadership education concentration take jobs after graduating, but some go on to graduate school in leadership studies, human resources, training and development, or education.
