ACES Study Abroad Programs

Experience life in another country for a summer, a semester, or academic year through College of ACES Study Abroad Programs. Whether it’s a short trip or longer stay, there is a program to help you meet academic goals at Illinois. Studying abroad will enhance your resume, expand your cross-cultural communications skills, allow you to see your home country from a new perspective, and give you unforgettable experiences.

“Being in a new country and learning about the people’s views really helps develop one’s own opinion and broadens one’s mind. It encourages the ability to tolerate, understand, and acknowledge the importance of incorporating different ideas when trying to solve a problem – important experiences you can’t gain from the classroom.”

— Arsema Weldu, Animal Sciences graduate

What are you waiting for?
